

Toby's Foundation Marks 2nd Anniversary!

How many more before we have the screening test?

If we support the research NOW by

- *Filling in the missing links in family groups*
- *Raising the necessary funds for Aussie research*
- *Continuing to submit blood samples*

and it turns out to be a simple recessive gene (which is how it now appears), than we may have a screening test in as little as 12–24 months!

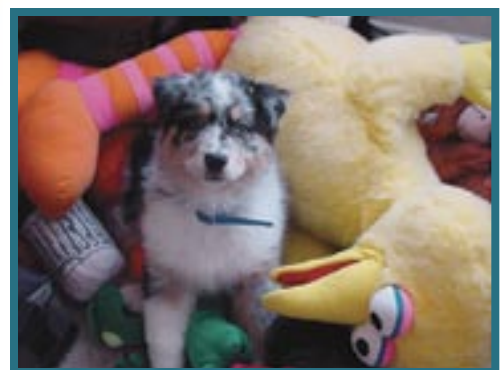

**Toby's Foundation has made a \$5000 pledge to
epilepsy research for the Australian Shepherd Breed!**
Making Tracks to Defeat Canine Epilepsy!

If you are interested in making a donation for the epilepsy research fund, please mark it for Aussie Epilepsy Research. All funds received as such will be sent to a Donor Advised Fund (DAF) at the Canine Health Foundation (CHF), which will match funds dollar for dollar. Please help us raise the necessary funds for this vital research. While we have accomplished a lot, there is still a lot to be done. With your support we can continue our work to defeat canine epilepsy. We have no time to waste. We must not lose our present momentum! We must stay on track!

Send marked donations to:
