

Connected

During this season of sharing and giving,
celebrate the relationships that bring us so much.

Toby, like so many other dogs, touches the lives of everyone he knows. Whether or not you have a dog with epilepsy, we are all connected not only by the bonds we form with our furry friends but also by the love we share for this amazing breed.

Dr. Patterson has shared that more blood samples are needed from *Aussies affected with idiopathic (primary) canine epilepsy*. If you have a dog with epilepsy and have not submitted a blood sample please do it now. A blood sample from your affected dog is essential to help the researchers find the genes responsible and develop a screening test.

This year we are aiming to raise \$20,000 to support the research, doubling our donation of \$10,000 from last year. Help us reach our goal. We can not do it without you! Please give.
