

Follow the Research to the Pot of Gold!

Let's find the genetic markers for epilepsy!

There are officially three researchers and institutions (Dr Johnson at UofMO; Dr Lohi in Finland; Dr Patterson at UofMN) sharing and analyzing data about our beloved Aussie and looking at it independently to ensure nothing is overlooked. It is not too long ago that we did not even have one researcher. Areas of mild association have been found. Additional testing is needed to confirm or exclude these areas and to find additional areas.

Thank you for your support. Please continue to help us in the fight against canine epilepsy.
