We can’t hide from epilepsy. It’s in the genes.

Shadow began showing signs of epilepsy at four months of age. He was diagnosed with Idiopathic (Primary) Epilepsy in October 2001. One month before his first birthday Shadow was euthanized due to Epilepsy.

Epilepsy threatens the future of our breed. Please give blood.

If you have an affected dog or a dog related to one, please help by donating a DNA sample to the University of Missouri for research that can lead to a genetic screening test for Aussies.
