## *I'm Looking to you.*

*Help me find the genetic markers for epilepsy.*

- Blood samples are needed from dogs that have been diagnosed with idiopathic (primary) epilepsy and from dogs that are 10+ years old that have never had a seizure to serve as controls for the University of Minnesota study.
- Donations are needed to support the research to continue to move it forward

For information, instructions and forms to submit a blood sample and/or for information to make a donation, please see below.

If you can help us by running a fundraiser or if you would like brochures to distribute please let us know. Thank you.
